

A PLAYER'S GUIDE

VOIDFORGED

Every rift goes deeper.

Greater Rifts · Rolled gear · Class sets · Paragon · Chronal Tributes

WELCOME

Welcome to Voidforged

Norrath as you remember it, with a tear running through it. Every character plays three classes, the endgame is an endless ladder of Greater Rifts, and the gear you earn there is rolled just for you.

This guide covers what is different here: how to reach The Void, how Greater Rifts work, the rolled rift gear and its set bonuses, and the long-term systems that turn platinum and AA points into power. A command reference is on the last page.

At a glance

Feature	What it means for you
Three classes	Every character combines three classes. Gear, spells and set bonuses for any of them count.
Level 65	The level cap is 65. Alternate Advancement opens at level 51.
Greater Rifts	Timed, randomized dungeons in 27 zones with tiers from 1 to 500. Opened by Zebuxoruk in The Void.
Rolled gear	Rift armor and jewelry roll their own stats when you buy them, weighted for your class. No two pieces are alike.
Class sets	Armor sets give bonuses at 2, 4 and 8 pieces; jewelry sets at 3, 6 and 9.
Glamours	Change how your armor and weapons look without losing stats.
Chronal Tributes	Rift-only tributes that boost you inside Fractures and pay for themselves in shards.
Paragon	Twelve deep AA lines for raw HP, mana, AC and heroic stats once you have the rest.
Reforging	Swap one random line on a rolled piece for a better one.
Quality of life	Buffs that don't wear off, no corpse runs, automatic combat abilities, the Nautilus Vault, personal loot offers (/nmsloot), gear sets, and more.

Quality of life

- **Buffs that hold.** Buffs you cast on yourself, and buffs from your group, stop counting down while the caster is in your zone and still has the spell (memorized in their book, a clicky on their gear, or a long-lasting AA). They stay on through death, and so does your summoned pet.
- **Death is cheap.** Dying costs no experience and leaves no corpse: you keep your gear and respawn at your bind point.
- **#autoskill.** Set combat abilities such as Kick, Bash, Backstab, Frenzy, Taunt or the monk strikes to fire on their own while you auto-attack. **#autoskill list** shows yours; **#autoskill <name> on** or **off** sets one.
- **Echo buffs.** During special events everyone gets the Echo buffs automatically: Echo of Experience and Echo of Luck (more experience, and luckier loot), Echo of Selo (run speed) and Echo of Power (HP, mana, AC, stats and haste).
- **Nautilus Vault.** Every character receives a Nautilus Vault on login. It gives you extra storage, lets you use clickies stored in it, and opens your bank and a merchant from anywhere.
- **Personal loot (/nmsloot).** When a mob dies, every group or raid member in the zone gets their own loot roll, offered in the /nmsloot window: keep it, sell it for platinum on the spot, or pass it to someone. Coin is split automatically. Grouped, the corpse's normal loot is replaced by these personal rolls; solo, you keep the corpse loot and your personal roll.

- **Melee while casting.** Auto-attack and ranged attacks keep going while you cast.
- **Gear sets.** Saving a set in the Bandolier window also remembers every worn slot. Loading it, or **#gear load <n>**, swaps your whole outfit from your bags, even in combat. **#gear list** shows your sets.
- **Bags and curios.** The Collector of Curios in the Bazaar sells Hero's Backpacks, Rucksacks and Boxes of Holding, Combinerators, the Unattuner and delivery vouchers for platinum.
- **Blessings.** Sneed Galliway (Bazaar and Qeynos) sells Heroes' and Legends' Blessings for 1 copper each.
- **Lockouts.** Non-respawning instances lock you out for 6 hours.

CHAPTER 1

The Void and Zebuxoruk

Freed from a prison woven through time, Zebuxoruk left the Chronal Fabric torn behind him. The tears are Fractures, and The Void is where you step into them.

Getting there

- **Requirement:** your account needs Plane of Time access (the Maelin flag, earned by defeating the four elemental gods). Without it, entering The Void returns you to the Bazaar.
- **Travel:** open the Bazaar map and pick The Void from the **Special** tab.

Who you'll find there

NPC	What they do
Zebuxoruk	Storyteller and keeper of the rifts. Hail him, ask about the Fabric, then click a tier to open a rift.
Chronal Quartermaster	Tier 1 class armor, for Chronal Shards.
Tier vendors	Armor, jewelry and augments for each gear tier, three vendors per tier, each titled with what it sells (for example "Tier 2 Jewelry").
Chronal Artificer	Reforges rolled gear (see Chapter 5).

When you hail Zebuxoruk:

> *"Ah, another mind drawn to the edge of everything. I am Zebuxoruk, and the Chronal Fabric is unraveling because of me."*

The 27 rift zones

The Crypt of Decay, The Ruins of Sebilis, Chardok, Befallen, Karnor's Castle, The Castle of Mistmoore, The Plane of Fear, Accursed Temple of Cazic-Thule, The Howling Stones, The Permafrost Caverns, The Sleeper's Tomb, The Plane of Hate, The Akheva Ruins, Grieg's End, Dreadspire Keep, Solusek's Eye, Nagafen's Lair, Kael Drakkel, Kaesora Library, Anguish, the Fallen Palace, Frostcrypt, The Convorteum, Kaesora, Sanctum Somnium, Riftseekers' Sanctum, Chapterhouse of the Fallen, Ashengate.

CHAPTER 2

Greater Rifts

A Greater Rift (a Fracture) is a private copy of a classic dungeon, filled with creatures pulled out of time. Fill the progress bar, kill the Guardian before the clock runs out, and the Fabric pays you.

Opening a rift

- Hail Zebuxoruk and say **rifts**. Click a tier, or say **tier <number>**.
- You can open any tier up to **one above your deepest clear**, to a maximum of 500. Progress is per character: grouping with someone deeper doesn't unlock tiers for you.
- Your group comes with you, but only members **standing in The Void** when the rift opens.
- The zone is picked at random from 27 dungeons. Rifts are free to open.
- One open rift per character. Say **re-enter** to go back to yours, or **close** to abandon it.
- If the rift's zone crashes, your progress, pylons, Guardian and exit portal come back when it restarts: re-enter and carry on. The clock keeps running.

Inside the rift

Time limit	15 minutes to kill the Guardian. Warnings count down at 12, 9, 6, 3 and 1 minutes.
Progress	Normal creatures add 1%, elites 4%. At 100% the Rift Guardian appears.
Pylons	At 25%, 50% and 75% a pylon spawns. Click it for a burst of power: **Conduit** (fire around you), **Cleansing** (group heal and cure), **Shielding** (big absorb shield) or **Speed** (haste, run speed, faster casting).
Champions	About 15% of creatures are champions, shown by their surname. **Molten** pulses fire and explodes when it dies. **Arcane** pulses magic damage. **Vortex** drags players who keep their distance into melee range; the tank is never pulled.
The Guardian	Damage pulses around it, calls adds at half health, wipes its hate list during phase shifts, and enrages two minutes after the pull.
Scaling	Creatures are level 65 to 70 and get tougher every tier: more health and damage, higher resists and AC, and their spells cut through resists from tier 1, more each tier, so stacking resists won't make you immune.
Respawns	Creatures respawn about every 3 minutes, so don't dawdle.

Rewards

Each player in the rift gets **Chronal Shards** (5 + 2 per tier, +25% if you finish in under 10 minutes) and **1,000 platinum per tier**. A new deepest clear also unlocks the next tier and, every 100 tiers, new gear.

Rift tier	Shards	Shards (fast)	Platinum
1	7	8	1,000
10	25	31	10,000
50	105	131	50,000
100	205	256	100,000
250	505	631	250,000
500	1005	1256	500,000

CHAPTER 3

Rift Gear

Rift gear is bought with Chronal Shards in The Void, comes in five tiers, and rolls its stats the moment you buy it.

Gear tiers and unlocks

Every gear tier unlocks from your own deepest clear. Vendors hide what you haven't unlocked, so an empty vendor means you need a deeper clear. Armor and jewelry vendors only list pieces for your own classes.

Gear tier	Armor	Jewelry	Augments	Stats	Name prefix
1	always	clear 25	clear 75	1x	—
2	clear 100	clear 125	clear 175	1.5x	Tempered
3	clear 200	clear 225	clear 275	2x	Exalted
4	clear 300	clear 325	clear 375	2.5x	Eternal
5	clear 400	clear 425	clear 475	3x	Timeless

Price (Chronal Shards)	Tier 1	Tier 2	Tier 3	Tier 4	Tier 5
Armor piece	25	50	100	200	400
Jewelry piece	15	30	60	120	240
Augment	40	80	160	320	640

- **Armor sets** have 7 pieces (Helm, Chestguard, Sleeves, Bracer, Gloves, Leggings, Boots); wear two Bracers for 8. **Jewelry sets** have 8 (Charm, Earring, Mask, Pendant, Mantle, Cloak, Girdle, Ring); wear two Earrings and two Rings for 10.
- Every rift **Girdle** carries 68% haste, so a belt covers your worn haste.
- Everything is **No Trade**, and you can only buy pieces for classes you have.
- Selling a piece back refunds a fifth of its price.

How a piece rolls

- **Always:** HP, AC, Mana and/or Endurance (casters Mana, melee Endurance, hybrids both), all regular stats weighted to the class, all six resists, Spell Damage, Heal Amount and Attack.
- **Sometimes:** regen, Shielding, Avoidance, Accuracy, Stun Resist, Strike Through, Damage Shield, Spell Shield, and physical, spell, DoT and heal crits. These can roll 0, and then the piece doesn't have them.
- **Random affixes:** 2 to 3 extra lines from your class's list, such as a weapon or defense skill %, Backstab or Flying Kick damage %, an element's spell damage %, Healing % or an instrument %.
- **Name:** your best random affix names the piece, for example *Shadowblade Boots of the Assassin*.
- Rolls stack with all your other gear, set bonuses, buffs, AAs and focus effects. Skill % raises the skill itself, which here drives both to-hit and damage. Percent bonuses are capped at 100%, crit chance at 50%.

Some slots roll stronger: Chest 125%, Legs 115%, Head and Feet 100%, Arms and Hands 90%, each Wrist 80%.

What a helm rolls, tier by tier

The guaranteed lines on a Helm (the 100% slot) for five sample classes. Random affixes and 0-able stats come on top. A single item's regular stat stops at 127.

Class	Tier	HP	Mana / End	AC	Main stat	Heroic	Power
Warrior	1 Chronal	424–518	End 290–350	124–161	STR 49–61	hSTR 19–25	ATK 26–44
	2 Tempered	636–777	End 435–525	186–241	STR 73–91	hSTR 28–37	ATK 39–66

Rogue, Monk and Berserker get the standout DEX rolls. Hybrids blend 75% of a melee class with 25% of a caster (Paladin = Warrior + Cleric), with 90% of the AC.

CHAPTER 4

Set Bonuses, Augments and Glamours

Wear enough pieces of your class's set and it starts paying you back.

Armor sets: 2, 4 and 8 pieces

Bonuses add up: at 8 pieces you have all three. Tier 2 to 5 sets give the tier 1 bonuses times the tier's multiplier, and each tier is its own set. With three classes, every set of each class counts separately, so 4 + 4 pieces of two sets give both 4-piece bonuses.

Set	Class	2 pieces	4 pieces	8 pieces
Juggernaut	Warrior	+250 HP, +15 AC	+40 AC, +10 HP Regen	+750 HP, +5 Shielding, +10 Stun Resist
Divine Conduit	Cleric	+5 Mana Regen, +250 Mana	+30 WIS, +8% healing	+10 Mana Regen, +5% Heal Crit
Bulwark	Paladin	+150 Mana, +200 HP	+30 AC, +5% healing	+500 HP, +3 Shielding, +10 Stun Resist
Wildstalker	Ranger	+25 Attack, +20 DEX	+10% Archery	+5% Physical Crit, +4% Archery Crit
Dread Harbinger	Shadowknight	+250 HP, +150 Mana	+10% disease and poison spells, +30 AC	+500 HP, +5% DoT Crit
Verdant Storm	Druid	+250 Mana, +5 Mana Regen	+5% healing, +8% cold and fire spells	+25 Damage Shield, +5% DoT Crit
Iron Fist	Monk	+20 AGI, +25 Attack	+10% Flying Kick	+5 Avoidance, +8% Physical Crit
Maestro	Bard	+25 CHA, +150 Mana	+10% all instruments	+500 HP, +5% Physical Crit, +5 End Regen
Shadowblade	Rogue	+25 Attack, +20 DEX	+10% Backstab	+9% Physical Crit, +10% Backstab Dmg
Spiritcaller	Shaman	+200 HP, +250 Mana	+20 STA, +10% cold, poison, disease spells	+5% DoT Crit, +5% healing, +10 Mana Regen
Lich Lord	Necromancer	+300 Mana, +5 Mana Regen	+10% poison and disease spells	+10% DoT Crit Dmg, +5% DoT Crit, +10 Mana Regen
Archmage	Wizard	+300 Mana, +30 INT	+10% fire, cold, magic spells	+15% Spell Crit Dmg, +5% Spell Crit
Elementalist	Magician	+300 Mana, +20 STA	+10% fire and magic spells	+5% Spell Crit, +25 Damage Shield
Mesmerist	Enchanter	+25 CHA, +300 Mana	+10 Mana Regen, +10% magic spells	+5 Spell Shield, +5% Spell Crit
Feral Bond	Beastlord	+150 Mana, +20 AGI, +20 STR	+10% Hand to Hand, +10% cold and poison spells	+8% Physical Crit
Bloodrage	Berserker	+25 STR, +250 HP	+10% Frenzy, +30 Attack	+10% Physical Crit, +15% Physical Crit Dmg

Physical Crit counts for every weapon attack: melee, archery, throwing, kicks, Backstab and the rest. Archery Crit adds to it for arrows only.

Jewelry sets: 3, 6 and 9 pieces

3 pieces give a percent boost (tier 1 value, tier 5 in brackets), 6 pieces a worn effect and 9 a proc, both one rank higher per tier. The worn effect starts a rank above the best that drops, so it always wins. Melee procs fire from weapon hits; spell procs fire when you cast damage spells.

Class	3 pieces	6 pieces (T1 to T5)	9 pieces (T1 to T5)
Warrior	+4% Defense, +3% Parry (12%, 9%)	Improved Parry / Block IV–VIII	Blessed Rune VI–X
Cleric	+4% healing, +3% heal crit (12%, 9%)	Divine Insight I–V	Sympathetic Healing Light I–V
Paladin	+4% healing, +3% heal crit (12%, 9%)	Improved Parry / Block IV–VIII	Remote Healing Surge IX–XIII
Ranger	+4% Archery, +3% archery crit (12%, 9%)	Sharpshooting VII–XI	Hail of Arrows I–V
Shadowknight	+4% disease and poison spells (12%)	Ferocity VII–XI	Vampiric Strike IX–XIII
Druid	+4% fire and cold spells (12%)	Divine Insight I–V	Sympathetic Healing Light I–V
Monk	+4% Flying Kick dmg, +3% Hand to Hand (12%, 9%)	Improved Dodge V–IX	Force of Magic IX–XIII
Bard	+4% all instruments (12%)	Accuracy I–V	Prismatic Strike IX–XIII
Rogue	+4% Backstab dmg, +3% Piercing (12%, 9%)	Cleave VII–XI	Strike of Venom IX–XIII
Shaman	+4% cold, poison and disease spells (12%)	Divine Insight I–V	Sympathetic Healing Light I–V
Necromancer	+4% disease and poison spells (12%)	Void Conduit I–V (pet focus)	Sympathetic Force of Corruption X–XIV
Wizard	+4% fire and cold spells (12%)	Arcane Insight I–V	Sympathetic Burst of Ice IX–XIII
Magician	+4% magic and fire spells (12%)	Void Conduit I–V (pet focus)	Sympathetic Force of Magic IX–XIII
Enchanter	+4% magic spells, +3% spell crit (12%, 9%)	Void Conduit I–V (pet focus)	Sympathetic Force of Magic IX–XIII
Beastlord	+4% Hand to Hand, +3% cold spells (12%, 9%)	Void Conduit I–V (pet focus)	Strike of Venom IX–XIII
Berserker	+4% Frenzy dmg, +3% 2H Slash and Blunt (12%, 9%)	Ferocity VII–XI	Burst of Ice IX–XIII

Divine Insight adds heal crit and mana regen; Arcane Insight adds spell crit damage and mana regen. Void Conduit is a pet focus (pet power 30 at tier 1 up to 70 at tier 5); it does not stack with a pet focus item, the stronger one counts. Hail of Arrows is an archery strike that grows from tier 1 to tier 5. Sympathetic Healing Light heals you each time it fires, so healers heal themselves while they nuke.

Augments

Rift augments have fixed stats, any class can use them, and they fit slot 1 or 2 of any rift armor or jewelry piece. Higher tiers multiply the stats; the focus effect stays the same.

Augment	Tier 1 stats	Focus
Bulwark Shard	+150 HP, +15 AC, +5 heroic STA, +10 Magic, Fire and Cold resist	—
Ferocity Shard	+15 Attack, +10 STR, +10 DEX, +4 heroic STR, +4 heroic DEX	—
Arcana Shard	+150 Mana, +20 Spell Damage, +10 INT	Improved Damage V
Mending Shard	+150 Mana, +20 Heal Amount, +10 WIS	Improved Healing V
Alacrity Shard	+200 Mana, +8 INT, +8 WIS	Spell Haste V
Valor Shard	+100 HP, +10 Attack, +10 Heal Amount	Mana Preservation VII

Glamours

Rift armor has a glamour slot (type 21). Eighteen **Glamour Outfitters** stand in the East Commonlands tunnel and sell glamours for 1,000 platinum each: Plate, Chain and Leather (every slot, 8 matching colors), seven Exotic vendors by slot, Robes, and seven weapon vendors by type. Your new look stays after zoning and everyone around you sees it.

CHAPTER 5

The Long Climb

Three systems turn rift income into permanent power. Their costs grow with you, so there is always something to spend on.

Chronal Tributes

Four tributes that only work inside Greater Rifts. Pick them at any tribute master like other personal tributes and turn tribute on.

- **Tiers stack.** Each tier covers 100 rift tiers: Tier I works in rifts 1–100, Tier II in 1–200, Tier III in 1–300, and so on. You get the bonus of the band you're in, up to your tribute's tier: Tier III gives its Tier I bonus in a tier 50 rift and its Tier III bonus in a tier 250 rift.
- **Cost:** 100 favor × the rift tier, per tribute, once per rift, taken when you enter. In a tier 120 rift that's 12,000 favor each. The normal 10-minute tribute charge doesn't apply to them.
- **Above your tier, or outside rifts,** a Chronal Tribute lies dormant and costs nothing. If you're short on favor, they stay dormant for that rift.

Tribute	Each tier gives
Chronal Might	+5 Attack, +3 heroic STR, +3 heroic DEX, +50 HP
Chronal Arcana	+10 Spell Damage, +10 Heal Amount, +50 Mana, +3 heroic INT, +3 heroic WIS
Chronal Bulwark	+5 AC, +75 HP, +3 heroic STA, +2 to each heroic resist
Chronal Fortune	+5% Chronal Shards from the rift's clear reward (never platinum)

Values are per band: Chronal Might in the 201–300 band gives +15 Attack and +150 HP. Starting values are modest and may be raised.

Paragon AAs

Twelve deep lines on the General tab, open from level 51. They cost more with every rank.

Line	Per rank	Ranks	Cost	Total
Paragon Vitality / Mind / Stamina	+25 HP / Mana / Endurance	50	5 AA, +1 per rank	1,475 AA each
Paragon Fortitude / Might	+1 AC / Attack	50	5 AA, +1 per rank	1,475 AA each
Paragon Ferocity	+1% melee damage	10	25 AA, +10 per rank	700 AA
Paragon heroic STR, STA, AGI, DEX, INT, WIS	+1 heroic stat	50	15 AA, +3 per rank	4,425 AA each

Heroic stats from Paragon count like heroic stats on items. Use the Voidforged client files, or the Paragon lines show without names.

Reforging

Don't like a random line on a rolled piece? The **Chronal Artificer** in The Void can replace it.

- **#reforge** lists the rolled items you carry. **#reforge <slot>** shows that item's lines and the price.
- Target the Artificer, then **#reforge <slot> <line>** to pay. You're offered two new lines; **#reforge <slot> take 1** or **take 2** swaps one in, **keep** leaves the current line. The offer is saved on the item, so you can zone and decide later.
- Only random lines (marked *) can be reforged, and **only one line per item, ever**: the first line you reforge is the one you can keep rerolling.
- **Cost:** 25,000 platinum and 50 Chronal Shards × (2 × item tier − 1), +25% for each earlier reforge of the same item, up to 5×.

Item tier	First reforge	Fifth reforge	Cap (17th on)
1	25,000 pp + 50 shards	50,000 pp + 100 shards	125,000 pp + 250 shards
3	125,000 pp + 250 shards	250,000 pp + 500 shards	625,000 pp + 1,250 shards
5	225,000 pp + 450 shards	450,000 pp + 900 shards	1,125,000 pp + 2,250 shards

REFERENCE

Commands and Tips

Command	What it does
Hail Zebuxoruk, say rifts	Open a Greater Rift. **tier <n>** picks a tier, **re-enter** returns you to yours, **close** abandons it.
#dyninfo	Compare all your rolled gear. Add a number, a slot, **compare a b** or **worn**.
#reforge	List, price and reforge rolled gear (pay and choose with the Chronal Artificer targeted).
#gear list / show <n> / load <n>	Your saved gear sets; save them in the Bandolier window.
#autoskill list / <name> on|off	Combat abilities that fire on their own while you auto-attack.
/nmsloot	Your personal loot offers: keep, sell or pass each one.

Command replies go to the Other chat window by default; scroll it if nothing seems to happen.

Comparing gear with #dyninfo

Command	What it shows
#dyninfo	Every rolled piece you own (worn, bags and bank) by slot: what you wear, and each spare as "X better, Y worse". Every piece gets a clickable number.
#dyninfo <number>	That piece against what you wear in its slot: Stat, Worn, This item, Change, with gains in green and losses in red.
#dyninfo <slot>	Every piece for one slot side by side, for example feet, wrist or weapon.
#dyninfo compare <a> <b>	Any two pieces against each other.
#dyninfo worn	Totals for everything you wear: rolled gear, other items, set bonuses, active procs and worn effects.

*The item window shows flat stats and your biggest skill bonus; #dyninfo shows everything, including percent bonuses and crits. Random affixes are marked *.*

Tips for climbing

- Push your deepest clear early: it gates every gear tier and the next rift tier.
- A fast clear (under 10 minutes) pays a quarter more shards. If a tier takes longer, dropping a few tiers often earns shards faster.
- Spread out your three classes' set pieces with care. A full 8-piece set beats two half sets at the top, but two 4-piece bonuses are strong while you gear up.
- Read the champion's surname before you pull. Bring Vortex champions to the tank; step away from Molten ones before they die.
- Save pylons for the Guardian when you can: Shielding and Speed shine in the boss fight.
- Use **#dyninfo <number>** before you sell anything. The better/worse count tells you at a glance.
- Turn on Chronal Fortune before a long session of fast clears; it pays for itself in shards.

See you in the Fractures.
